

Sprint 2 Plan  
Pronzo  
Noodles  
Completion: 05 - 16 - 2017  
v1.0.0  
Revision: 05 - 02 - 2017

## Goal

- Build the backend into the application
- Create a easy to navigate application with all the pages outlined in our design
- Integrate the Yelp database into our search feature

## User Stories

- As a user, I want to see when and where other like-minded professionals are planning to go to lunch so that I can schedule meetings (8)
  - Develop a database through Firebase (6 hours)
  - Connect database to post board page (3 hours)
- As a user, I want to be able to adjust my settings to match up with my interests, to connect myself to other like-minded people. (2)
  - Work on the settings page (4 hours)
  - Build the user authentication with the backend (3 hours)
- As a user, I need to be able to quickly and easily communicate with someone I am meeting with so that we can better coordinate (specific) times and locations. (13)
  - Integrate cloud messaging (8 hours)
- As a user, I want to use the Yelp API with the search bar to make a restaurant database available to browse through (3)
  - Integrate the yelp api into the search feature (3 hours)
- As a user I want an auto-completion/auto-suggestion feature so I can easily locate a restaurant (5)
  - Build a search bar that gives a user many results that are not word specific or found with a regex expression (2 hours)

## Team Roles

- Roy Shadmon: Product Owner
- Dean Rabinowitz: Developer
- Shanee Dinay: Scrum Master
- Surya Ruddaraju: Developer
- Alex Au: Developer

## Initial Task Assignments

- Roy Shadmon
  - As a user, I want to see when and where other like-minded professionals are planning to go to lunch so that I can schedule meetings (8)
    - Develop a database through Firebase (7 hours)

- Dean Rabinowitz
  - As a user, I want to be able to build a profile so professionals can see if they are interested in connecting with me. (3)
    - Build the features of a profile page and add edit profile options (4 hours)
- Shanee Dinay
  - As a user, I need to be able to quickly and easily communicate with someone I am meeting with so that we can better coordinate (specific) times and locations. (13)
    - Integrate cloud messaging (8 hours)
- Surya Ruddaraju
  - As a user, I need to be able to quickly and easily communicate with someone I am meeting with so that we can better coordinate (specific) times and locations. (13)
    - Integrate cloud messaging (8 hours)
- Alex Au
  - As a user, I want to use the Yelp API with the search bar to make a restaurant database available to browse through (3)
    - Integrate the yelp api into the search feature (3 hours)

### **Initial Scrum Board**

<https://trello.com/b/nXdi90gW/cs115project>

### **Scrum Times**

- Monday, 4:10 pm, TA Oaks
- Wednesday, 5:20 pm, Science and Engineering Library 138
- Sunday
