

Sprint 1 Plan
Pronzo
Noodles
Completion: 04 - 10 - 2017
v1.0.0
Revision: 04 - 10 - 2017

Goal

- Create a usable application with user profiles. Users will be able to fill in their information, food preferences, and user interests
- Create a settings page so a user can change and update their settings
- Create a post board for meet ups with the intention of adding a map linked to the posts

User Stories

- As a user, I want an application that can connect me with professionals that work in the same field and share common interests as me so that I can build connections within my industry and people alike (21)
 - Build the basic framework of an application with navigation buttons to get to the app's pages (10 hours)
- As a user, I want a login in using Linkedin or .edu email to ensure a safe login system (2)
 - Find a back end database/server to store and hold users, general profile info, and meet up posts (3 hours)
 - Create a signup that checks for .edu email when creating a profile (3 hours)
- As a user, I want to build a profile that other professionals may view so that I can connect with interesting users. (3)
 - Research and pick a database and set up the database (3 hours)?
 - Upon creation of account, create the user in the database with basic information (3 hours)
 - Name, food preferences, interests
 - Create a button that changes profile values for the user only by having a text field or a photo upload option. (2 hours)
 - Create a tab to edit the user's preferences/interests, change password, change profile picture (3 hours)
- As a user, I want to see when and where other like-minded professionals are planning to go to lunch so that I can schedule meetings at convenient times and locations (8)
 - Create a storyboard tab (2 hours)
 - Create a nice layout for users to see usernames and interests (2 hours)
- As a user, I want to view a map to see the locations of other user's meeting posts so I can see how close others are to me. (5)
 - Research the Google map API (3 hours)

Team Roles

- Roy Shadmon: Product Owner
- Dean Rabinowitz: Developer

- Shanee Dinay: Scrum Master
- Surya Ruddaraju: Developer
- Alex Au: Developer

Initial Task Assignments

- Roy Shadmon
