

Release 1 Plan  
Pronzo  
Pronzo Developers  
Capellini  
Release: 04 - 10 - 2017  
v1.0.0  
Revision: 04 - 19 - 2017

## High Level Goals

- Create a usable application
- Create user profiles with user information, food preferences, and interests
- Create a post board for meet ups with the intention of adding a map linked to the posts
- Deploy a restaurant database for users to easily choose from restaurants near them

## User Stories for Release

### Sprint 1

- As a user, I want an application that can connect me with professionals so that I can build connections within my industry (21)
- As a user, I want a login in with LinkedIn or .edu email logins only to ensure a safe login system (2)
- As a user, I want to be able to build a profile so professionals can see if they are interested in connecting with me. (3)
- As a user, I want to see when and where other like-minded professionals are planning to go to lunch so that I can schedule meetings (8)

### Sprint 2

- As a user, I want to view a map to see the locations of other user's meeting posts so I can know how close others are to me. (5)
- As a user, I need to be able to quickly and easily communicate with someone I am meeting with so that we can better coordinate (specific) times and locations. (13)
- As a developer, I want to use the Yelp API with the search bar to make their restaurant database available (3)
- As a user I want an auto-completion/auto-suggestion feature so I do not have to type a specific restaurant but a style of food and receive results (5)

### Sprint 3

- As a user, I want to report dangerous activity so that I do not have spam activity on my interface (5)
- As a user I want to be able to filter various categories to create an event feed more catered to my preferences.(5)

## Product Backlog

- Companies submitting ads for meal discounts
  - As a marketer, I want people using the app to go eat at my restaurant. (13)
