# Installation Guide for Pronzo

1. Download and unzip Pronzo-F.zip from https://github.com/royshadmon/Pronzo
2. In terminal (from the downloads folder), cd into the directory: /Downloads/Pronzo-F
   (If you ls the directory, you should see these files:

```
[eduroam-169-233-193-167:Pronzo-F royshadmon$
[eduroam-169-233-193-167:Pronzo-F royshadmon$ ls
Events.png              Podfile.lock            Pronzo.xcodeproj
Login.png               Pods                    Pronzo.xcworkspace
LoginPage.png           Profile.png             User.swift
Podfile                 Pronzo                  code
eduroam-169-233-193-167:Pronzo-F royshadmon$
```

   a. Type into terminal: pod install
   b. Wait for the installation to complete.
3. Open Pronzo.xcworkspace in Xcode.
4. Use an iPhone 7 for the simulation.
5. Press the play button

6. The project will build successfully and the simulator in your dock should appear. (The yellow arrow is point to the simulator. Press it and it will open the running project).

7. You may freely use the application.
    a. Note: You must Sign Up before you can Sign In.
