v1.0.0
Revision: 05 - 17 - 2017

Actions to Stop Doing
- The team should stop writing code individually so that code merging is not a problem in the future. Also we are more productive when we are pair programming.

Actions to Start Doing
- The team should do more pair programming, since developing on multiple computers brings up a lot of bad merges.
- The team should start considering what user stories we have time to complete in the given time constraint and prioritize those user stories.

Actions to Keep Doing
- The team should continue scheduling more group work sessions, so we can work together to develop the application.
- The team should continue using slack as communication methods because it is efficient and spreads the word well.
- The team should continue meeting multiple times a week, since it helps us stay on track.

Work Completed
- As a user, I want to use the Yelp API with the search bar to make a restaurant database available to browse through (3)
- As a user I want an auto-completion/auto-suggestion feature so I can easily locate a restaurant (5)
- As a user, I want to see when and where other like-minded professionals are planning to go to lunch so that I can schedule meetings (8)
- As a user, I want to be able to build a profile so professionals can see if they are interested in connecting with me. (3)
- As a user, I want a login in with Linkedin or .edu email logins only to ensure a safe login system (2)
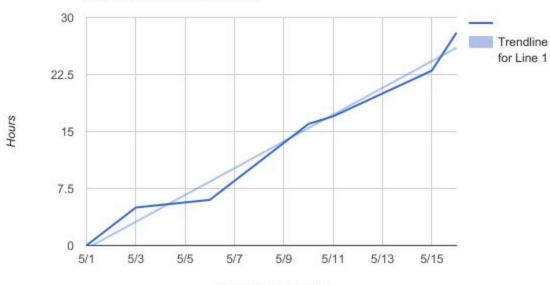

Work Not Completed
- As a user, I need to be able to quickly and easily communicate with someone I am meeting with so that we can better coordinate (specific) times and locations. (13)
- As a user, I want to be able to adjust my settings to match up with my interests, to connect myself to other like-minded people. (2)
